

COMMUNICATIONS PLAN

Women's Health Seminar: The Impact of Pregnancy on Women's Brain Health

womenmind · WHRC · CAMH | Dr. Liisa Galea | Virtual · Free · Tuesday May 12th, 2026 · 1 PM ET

OBJECTIVE

This plan aims to drive awareness and attendance for a free virtual seminar on the impact of pregnancy on women's brain health, featuring Dr. Liisa Galea. By meeting each audience where they already are, through culturally resonant content on Instagram, research-forward messaging on LinkedIn, and direct outreach via MailChimp and Substack, every tactic is designed to expand our reach beyond its existing network while maintaining the integrity and credibility of the science.

TARGET AUDIENCES AND KEY MESSAGES

Audience	Who They Are	Platform	Key Message
Academic and Research	Neuroscientists, psychiatrists, clinicians, trainees	LinkedIn, Email/Newsletter (MailChimp), Substack	Dr. Galea is filling a critical gap in women's brain health research. Come dive into the science connecting pregnancy to brain health.
Clinicians	OBGYNs, midwives, perinatal mental health providers	LinkedIn, Email/Newsletter (MailChimp)	Understanding the neuroscience of perinatal mental health has direct clinical implications for how we screen, treat, and support patients.
General Public	Pregnant women, new mothers, women planning families	Instagram, LinkedIn	Pregnancy changes your brain, not just your body. This free seminar brings the science into plain language so you can understand what is happening and why it matters.
Donors and Funders	womenmind supporters, philanthropic partners	LinkedIn, Email/Newsletter (MailChimp)	This is what your investment in women's mental health research makes possible. World-class science, made accessible.

TACTICS AND TIMELINE

When	Tactic	Channel	Detail
4 weeks out	Event flyer Flyer	LinkedIn, Instagram, Email	Standalone event poster with speaker photo, date, time, QR code, and registration link. Posted as a single image on both platforms.
3 weeks out	Speaker spotlight Post	LinkedIn, Instagram	Dr. Galea bio and research. Tag @CAMH @whrcluster
3 weeks out	Brain Health & Pregnancy Carousel Post	Instagram, LinkedIn	4-slide carousel built for reel dimensions. Dual placement in feed and reels tab. Repurposed as a PNG multi-image post on LinkedIn. One asset, two platforms, two audiences, no added production.
3 weeks out	Partner outreach & Event flyer Push	Instagram feed & story	Push flyers on stories and ask community partners to promote also. Drive to registration link.
2 weeks out	Newsletter	MailChimp, Substack	Full event details and registration CTA. MailChimp reaches womenmind's existing contact database; Substack builds a new independent subscriber list; different segments, no overlap.
1 week out	Save the Date Reel	Instagram, LinkedIn	Seminar reminder. Reels are algorithmically prioritised on both platforms for maximum reach.
1 week out	Partner Partner outreach & Event flyer Push	LinkedIn	Direct ask to CAMH partners, WHRC collaborators, and womenmind donors to amplify across their networks. Drive to registration link.
Day of	Story Reminder	LinkedIn, Instagram, Email	Zoom link, time, speaker reminder. Instagram Stories countdown sticker. LinkedIn pinned post update.
Within 48 hrs	Post-event recap	Substack, LinkedIn	Key takeaways, quotes from Dr. Galea, recording link if available. Substack recap drives new subscriber conversions for future events.

WHAT SUCCESS LOOKS LIKE

This plan succeeds when registrations grow beyond the existing womenmind network, when content reaches audiences with no prior relationship with CAMH, and when the event drives new followers, registrants, and conversations about women's brain health research. Engagement quality matters as much as volume; comments, shares, and saves signal that the science landed.

you've seen the list.

now swipe through what the science actually says.

pregnancy doesn't just change your body. It changes the structure, volume, and function of your brain. The forgetfulness, the mood shifts, the feeling that you're not quite yourself, there's a neurological explanation for all of it.

And here's the part nobody talks about: some of those changes are protective.

*Dr. Liisa Galea, womenmind Chair in Women's Mental Health at CAMH, has spent her career proving that the female brain deserves to be studied. This seminar brings her findings to you, for **FREE**.*

only 3% of neuroscience studies have ever focused on the female brain.

for centuries, pregnancy and its impact on women's mental health went largely unstudied. Researchers like Dr. Liisa Galea are changing that.

join us for a free virtual seminar and hear the research that has been missing for too long.
